CENTER FOR DIGITAL SOCIETY AND DATA STUDIES PRESENTS

PRIVACY, APPLE, AND THE FBI

An expert panel discussion about the tensions that exist between our needs for both privacy and security

PANELISTS:

Lee Rainie, the Director of Internet, Science and Technology research at Pew Research Center (will join the panel via Skype).

Derek Bambauer, UA professor of law, studies Internet law, intellectual property, Internet censorship and cybersecurity

Stephen Rains, UA associate professor of communication, examines the implications of new communication technologies for health communication.

Suzanne Weisband, Associate Professor of MIS, researches medical informatics, online leadership, and work interruptions and performance. She has also been involved in internet ethics, software development, and media literacy.

Yotam Shmargad, UA assistant professor of information, analyzes large sets of online user and behavior data and studies online privacy, political networks, and information diffusion.
